PLAN TO COMPLETE BUDAPEST SUBWAY SECTION IN 1951

SUNKEN TERMINAL PLANNED -- Budapest, Vilagossag, 25 Aug 51

The terminal of the Budapest express subway will be sunk into the ground like a large trough, 600 meters from the Nepstadion. The terminal will be crowned by two large domes, models of which are now on display at the Five-Year Plan Exhibition. The workers building the terminal have just announced that the have penetrated and completed digging to a depth of two stories. At present, the scaffolding and concrete work on the staircases of the two domes are under way, and excavations have been started for the staircages outside the domes.

According to plans, the section between Hungaria-korut and Dozsa Gyorgyut must be completed this year. To make up for time lost in the past, workers have decided to complete this year's plan in December. A "Macko" revolving crane, mounted on a truck, and an excavating machine of the caterpillar-track type have just arrived from the USSR and will be used in the construction.

The constructions in connection with the subway have led to changes in the surrounding area. The tracks of the HEV (Metropolitan Suburban Railroad) at the crossing of Kerepesi-ut and Hungaria kcrut have been moved because parts of the terminal will be located beneath the road crossing.

WORK PROGRESSING ON NEW SUBWAY -- Budapest, Vilagossag, 15 Sep 51

Construction of the new express subway is progressing according to plan, and work has been started on the tunnel under Rakoczi-ut.

The following sketch shows the projected Budapest subway line and station locations.
